N/E: National Objective for the Year 2010 has not been established.

N/A: Prevalence data is not available in California.

\* Rate or percent unreliable; relative standard error greater than or equal to 23%.

<sup>1</sup> Due to the change from ICD 9 to ICD 10 that occurred in 1999, two-year averages are used on mortality data for specific causes. Three-year averages are reflected for the "All Causes" mortality data.

<sup>2</sup> Age-adjusted rates cannot be compared to data prior to 1999 due to the change from using the 1940 to 2000 standard population proportions to calculate age-adjustments.

Note: Crude death rates, crude case rates, and age-adjusted death rates are per 100,000 population. Birth cohort infant death rates are per 1,000 live births. Age-specific birth rates are per 1,000 population.
