

Is live!

DataShare Santa Cruz County (DataShare SCC) is the new interactive data platform with local, state, and national data that allows you to explore and understand information about the Santa Cruz County community.

Loaded with tons of data, and with easy-to-use report, and dashboard building tools, DataShare SCC offers you access to hundreds of data points to deepen and inform your knowledge of many aspects of life in our county. Please use the platform for your advocacy efforts, grant application, program planning, presentation preparation, or any other way it is useful.

Please take some time to visit DataShare SCC and see what is there. There are many instructional videos to show you how the new platform works. Any organization or member of the public will be able to use the website as a tool to look at data, create dashboards and reports for downloading, find evidence-based practices, and track county progress toward strategic goals.

DataShare Santa Cruz County is the result of many hours of work by the DataShare SCC Steering Committee, Santa Cruz County Health Services Agency, and HIP. We thank them for their dedication to bringing DataShare to fruition.

We greatly appreciate the generous funding provided by Community Foundation Santa Cruz County and the Health Services Agency of Santa Cruz County that has launched DataShare SCC!
